## Analysis My Own House

Week 1  
Fan Cao

### Description:

My room is sited at the 3rd floor of an old four-story house. 40th Street just in front of my house. There is an similar four-story house at the north side of our house.

### Disadvantage:

1. The windows on the north side cannot open. Next building is too close to my room.
2. The east side window is too big which makes me cannot open the windows in the morning.
3. On the east side of my house is the 40th street, and is kind of noisy.
4. There is not heater on the north side. Sometimes may feel cold.
5. The entrance of my room is directly connect to the hallway, so there is not visual block to my room.
