

## + My Living Condition Analysis:

①. Acoustic. Solution → No. Idea.

Next to my house, there's a fraternity's "party house." Noisy !!!

②. Airflow Solution → Add new wind input/output Advice. → I need to analyze the wind data,

The Airflow is in poor condition, means that if I look or smoke inside my studio, that's a disaster. <sup>So I can know when to open the window to optimize the airflow.</sup>

③. Moisture. Solution → Add Air Passage to bring Air → Blower/Dryer.

Because of the poor airflow, my restroom is always wet.

④. Sunlight Solution → Add Light → Analyze where is the darkest place and add light.  
The house light environment is not satisfied.

⑤. Sunlight Reflection Solution → Block it! → I need the Radiation Data.

The working area in my studio is facing the annoying reflection issue in the morning.
